

José Cancino

Team Lead & Senior Full Stack Developer

B. S c . Computer Engineering

jose.cancino@outlook.com

10+ years of work experience.

Expertise in React, Next.js, TypeScript, PHP, Node.js, PostgreSQL, MySQL, GitLab

Familiar with Symfony, Laravel, CodeIgniter, Docker, SEO, Mixpanel, E2E testing,

Unit Testing, WordPress, Azure AI Translation

English – upper intermediate; Portuguese - intermediate; Spanish - native.

JoVE: Mar 2022 – Sep 2025 – Team Lead & Senior Full Stack Developer

Project: Scientific publishing platform, engineering infrastructure.

- Implemented Mixpanel analytics tracking 1M+ daily events (actions, workflows, interactions)
- Built Azure-based AI translation pipeline processing 25,000+ scientific articles into 13 languages
- Led two platform redesigns involving 15 contributors (dashboards, planning tools, workflow systems)
- Created cross-squad daily visibility dashboard for engineering alignment and blocker detection
- Developed internal Highlight & Inspector extension (full-site data-testid coverage in 2 days)
- Improved SEO structure (canonical, JSON-LD, metadata) across thousands of pages
- Mentoring, architecture reviews, cross-team coordination (QA, Product, SEO, DevOps)

Chilean Army: Mar 2021 – Dec 2021 – Software Engineer

Project: Internal systems & automation.

- Backend services and APIs using Node.js + PostgreSQL
- Automated daily internet-to-intranet data synchronization replacing manual early-morning data transfers and reducing operational effort to zero
- Agile delivery in planning, implementation, testing, deployment

Freelance: Jan 2020 – Jan 2022 – Team Lead, Full Stack Developer

Projects: E-commerce, healthcare platforms, pet food stores.

- Full stack development with PHP, Symfony, React, MySQL
- Websites, landing pages & admin dashboards (responsive & SEO-optimized)
- Requirements, timelines, client delivery, supervision of junior collaborators

Accenture: Jul 2015 – Dec 2019 – Software Engineer

Project: Enterprise systems for large-scale clients.

- Architecture analysis, development, and performance tuning
- Delivery of scalable software with minimal downtime
- Testing planning, execution, and direct client support
- Direct client collaboration for requirements, support, and delivery alignment

Skills: React, Next.js, TypeScript, PHP, Node.js, PostgreSQL, MySQL, GitLab, Symfony, Laravel, Docker, SEO, Mixpanel, E2E Testing, Unit Testing, WordPress, Azure AI Translation.
